DATE: 6 February 1974

TO: Messrs. Stoertz and

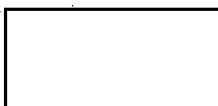

SUBJECT: Briefing on Throw Weight

Attached is a 31 January note I have received from Harry Sauerwein in Hall's office. It is self-explanatory. For some reason he is quite anxious to present this throw weight briefing. It relates to the two other notes also attached, one from Sauerwein to Hall (21 December) and the other from Hall to Colby (26 December).

After we have heard the briefing we should prepare some kind of comment for Colby to send back to Hall to close the circuit.

Hall's 26 December note to Colby refers to a throw weight uncertainty study. I am giving this to Mr. Stoertz but, at this stage, not making additional copies.

George A. Carver, Jr.
